Revised significantly from the 1985 version, the 1999 Standards has more in-depth background material in each chapter, a greater number of standards, and a significantly expanded glossary and index. The new Standards reflects changes in federal law and measurement trends affecting validity; testing individuals with disabilities or different linguistic backgrounds; and new types of tests as well as new uses of existing tests. The Standards is written for the professional and for the educated layperson and addresses professional and technical issues of test development and use in education, psychology, and employment. This book is a vitally important reference for professional test developers, sponsors, publishers, users, policymakers, employers, and students in education and psychology.

Revised 1999. Paperback ([order form](#))  
Developed jointly by the [American Educational Research Association](#), [American Psychological Association](#), and the [National Council on Measurement in Education](#)

AERA released a [new edition](#) of the *Testing Standards* in 2014.
